

THE SPETSES THALASSA PROJECT MANIFESTO

Created by the community, for the community.

1. Leave Only Footprints

The golden rule. Whatever you bring to the beach (bottles, organic waste), leaves with you. If the local bins are full, take your bag home.

2. The "Plus One" Rule

Whenever you visit a beach pick up at least **one** piece of litter that isn't yours. If everyone does this, the beach cleans itself.

3. Record to Reward

Data is power! Always log your collection . Sharing what we find helps us identify where the waste is coming from and how to stop it at the source.

4. Respect the Ecosystem

Avoid disturbing local flora and fauna. If you find a specific coastal plants, keep a respectful distance.

5. Lead by Example, Not Lecture

If you see someone leaving trash, be a friendly neighbor. Offer them a spare bag or kindly point them to the nearest bin. We build a community through kindness, not confrontation.

6. Share the Story

Take photos of your "finds" and your team in action. Your post might be the reason someone else decides to adopt a beach tomorrow.
